

ethos

Creative and sophisticated, **ethos** delivers a minimalist appearance by offering slimline features and using contemporary materials.

Cubicle doors and divisions are manufactured using 18mm high density moisture resistant chipboard (to V313) faced both sides with **high pressure laminate**. Panel edges are lipped with matching or contrasting PVC.

The **minimalist pilasters** are manufactured using folded **Optisheen stainless steel**. The cubicle doors and partitions can also be manufactured from materials including **toughened glass**, **real wood veneers** and other diverse materials such as **cast acrylic**.

For wet areas cubicle doors and divisions will be manufactured using **12/13mm solid grade laminate (Ethos+)**.

A co-ordinated range of stainless steel ironmongery is supplied with all **Ethos** cubicles.

Cubicle legs are set back from the cubicle frontage to create a **floating appearance**, and are fully adjustable to accommodate varying floor levels.

Easily operated by people with limited dexterity the indicator bolt also features an external emergency release facility. Sprung loaded hinges and a unique dampening system help to **soft close the cubicle door**. The cubicle partition is fixed to the rear wall/pilaster with discreet stainless steel channel brackets.

Each cubicle is supplied with a stainless steel coat hook. Lateral stability is achieved through the continuous stainless steel headrail, running across the head of the cubicle. **Ethos** cubicles can be supplied to comply with the latest **Building Regulations Part M & Disability Discrimination Act (DDA)**.
