

function

Economical and durable, **function** provides style, a wide range of colours and high quality ironmongery.

Cubicles are available with two levels of board performance, **Function** and **Function+**.

Function panels are manufactured using 19mm melamine faced high density **moisture resistant chipboard** (to V313), panel edges are lipped with a matching or contrasting PVC.

Function+ panels are manufactured using 18mm high density moisture resistant chipboard (to V313) faced both sides with **high pressure laminate**. Panel edges to doors, pilasters and partitions are lipped with a matching or contrasting PVC. **Postformed vertical edges** to the cubicle pilasters can also be provided (Function+pf).

The partition mounted cubicle leg is adjustable to accommodate varying floor levels. The smooth action indicator bolt features an external **emergency release facility** discreetly positioned within the sleek faceplate. Cubicle hinges are pilaster mounted and secured through the door to provide an **anti finger trap** detail. These hinges can be easily adjusted to allow the door to fall fully open, closed or ajar. Partitions and pilasters are secured to the surrounding walls with semi circular channel brackets. Each cubicle is supplied with a **sturdy aluminium** coat hook. Lateral bracing across the width of the cubicle is achieved through the distinctive, stylish headrail.

For added **strength and increased corrosion resistance**, all cubicle fittings are manufactured using high quality polished aluminium.

Function and **Function+** cubicles can be supplied to comply with the latest **Building Regulations Part M & Disability Discrimination Act (DDA)**.
