

liquid

Stylish, versatile and robust, **liquid** provides the perfect solution for the most demanding environments.

For ultimate durability, cubicle doors, pilasters and partitions are manufactured using **13mm solid grade laminate**. Exposed edges to the doors and pilasters are machined to a smooth profiled finish.

Solid grade laminate is **impervious to water and extremely resilient**, making Liquid ideal for areas of high usage and humidity. Cubicle legs are pilaster mounted and adjustable to accommodate varying floor levels.

The smooth action indicator bolt features an external **emergency release facility** discreetly positioned within the sleek faceplate.

Cubicle hinges are pilaster mounted and secured through the door to provide an **anti finger trap** detail. These hinges can be easily adjusted to allow the door to fall fully open, closed or ajar. Partitions and pilasters are secured to the surrounding walls with semi circular channel brackets. Each cubicle is supplied with a **sturdy aluminium** coat hook. Lateral bracing across the width of the cubicle is achieved through the distinctive, stylish headrail.

For added strength and increased corrosion resistance, all cubicle fittings are manufactured using high quality polished aluminium.

Liquid cubicles can be supplied to comply with the latest **Building Regulations Part M and Disability Discrimination Act (DDA)**.
