

lofty

Floor to ceiling privacy and three board performance options, **Lofty** has the answer to all budget requirements.

Cubicles are available with three levels of board performance, **Lofty Entry, Lofty and Lofty+**.

Lofty Entry panels are manufactured using 19mm melamine faced high density moisture resistant chipboard (to V313), panel edges are lipped with a matching or contrasting PVC. **Lofty** panels are manufactured using 18mm high density moisture resistant chipboard (to V313) faced both sides with high pressure laminate. Panel edges are lipped with a matching or contrasting PVC. **Lofty+** panels are manufactured using 12/13mm solid grade laminate. Exposed edges to the doors and pilasters are machined to a smooth profiled finish. Solid grade laminate is impervious to water and extremely resilient, making **Lofty+** ideal for areas of high usage and humidity. Cubicle doors can be specified as a standard height door with an overpanel or a full height door that extends to the ceiling. The cubicle partition is fixed 10mm from the floor finish and 15mm from the ceiling finish. The cubicle pilaster is secured to the floor with a purpose designed aluminium extrusion, powder coated to a RAL colour of your choice. Easily operated by people with limited dexterity the indicator bolt also features an external emergency release facility. Each cubicle is supplied with a coat hook. Lateral stability is achieved through the continuous aluminium headrail, running across the head of the cubicle. Cubicle hinges are pilaster mounted and secured through door to provide an anti finger trap. These hinges can be easily adjusted to allow the door to fall fully open, closed or ajar.

Lofty cubicles can be supplied to comply with the latest Building Regulations Part M and Disability Discrimination Act (DDA).
