

art

Versatile and distinctive, art offers the solution for both high use and sophisticated washrooms.

Cubicle doors and divisions are manufactured using 18mm high density moisture resistant chipboard (to V313) faced both sides with high pressure laminate. Panel edges are lipped with matching or contrasting PVC. The elliptical pilasters are manufactured using aluminium extrusions powder coated in a RAL colour of your choice. The cubicle doors and partitions can also be manufactured from materials including toughened glass, real wood veneers and other diverse materials such as 3form. For wet areas cubicle doors and divisions will be manufactured using 12/13mm solid grade laminate (Art+). A co-ordinated range of polished aluminium ironmongery is supplied with all Art cubicles. Cubicle legs are set back from the cubicle frontage to create a floating appearance, and are fully adjustable to accommodate varying floor levels. Easily operated by people with limited dexterity the indicator bolt also features an external emergency release facility. The cubicle partition is fixed to the rear wall/pilaster with channel brackets. Each cubicle is supplied with a coat hook. Lateral stability is achieved through the continuous aluminium headrail, running across the head of the cubicle. Art cubicles can be supplied to comply with the latest Building Regulations Part M & Disability Discrimination Act (DDA).
